“I am Mrs. Dorothee from BAKA community, from the territory of Yahuma in the Province of Tshopo in Congo. We are a community living deep in the forest and we depend on the forest for everything. But now, our community is threatened due to land grabbing by the Bantu neighbours, forest loggers, mining companies, and many others who want to take away all our natural resources.”

The Congo Basin, the Amazon and the Asian forests are the lungs of our world. Today they struggle to breathe. They are literally and figuratively on fire. With the call of Pope Francis to care for our Common Home, under the aegis of the [Season of Creation](#), together with the [Dicastery for Integral Human Development](#), [Global Catholic Climate Movement](#), [JPIC](#) and many other Church groups and Jesuit networks, the Social Justice and Ecology Secretariat, is organizing a Global Ignatian (Jesuit) Prayer Vigil to pray for ecological conversion and action for justice. The vigil will feature testimonies, reflections of the people and communities directly affected combined with symbolic and interactive moments.
